*Agenda subject to change

"I just left the CROSSCODING: Unlocking the Code to Medical Billing in Dentistry in Seattle. I have taken many courses like this one in my career, but this one was hands-down the best. The advice and coaching were relevant and ethical. I have attended courses where the advice proved to be incorrect, which can be disastrous for the provider(s). The advice Rose Nierman provided, coupled with her coding background and examples to support the advice, left me (and I think probably everyone else in attendance) feeling very confident that I could return to my practices and safely implement her suggestions. The entire course stayed on point and finished in the time stated while still allowing ample time to answer questions and provide clarification so that everyone in attendance understood what she meant and how it applied to each type of practice and specialty. The handouts and course manual will prove invaluable as we navigate the medical billing waters in the weeks to come. For anyone thinking of taking this course: DO IT! You will be so glad you did." - Genie Morgan
